TECHNICAL DATA SHEET AVOCADO PULP WITH ONION

TECHNICAL DATA SHEET AVOCADO PULP WITH ONION

PRODUCT DESCRIPTION

Product whose color, smell, taste are typical of its components. The avocado used is 100% Colombian. The fruit is selected and pulped manually to ensure good treatment. All the equipment involved in the manufacturing process and packaging are in stainless steel and the process is designed to guarantee the smallest task of the pulp after pulping. This product allows to prepare any water based dish without being limited to pulp preparations that come with various ingredients, or using it can be used as it comes. This pulp base allows each client to finish with their guacamole adding the other ingredients, with the holes in the time, wear, cost in the handling, storage and transport of the fruit.
